Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: in line 18, "*an* reflected".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-8, 10, 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by

Aziz et al. (US 2004/0083869 A1).

Aziz et al. discloses the invention including:

- Claims 1, 5, 7, 10, 12 and 13; a base (Fig. 1), a fence with an abutment surface (front surface of the fence in Fig. 1), a cutting unit supporting a circular saw blade 12 provides a plurality of blade tips, a support unit, a light projecting device or illumination unit 14, a mirror 18 provided at a position in confrontation with the side workpiece in abutting contact with the abutment surface of the fence for reflecting the line on the side of the workpiece and for allowing an reflected line image (see Fig. 3 and paragraph 0030).

Art Unit: 3724

- Claim 2; a turntable (Fig. 1).
- Claim 3; the mirror is secured to the cutting unit (Fig. 1).
- Claim 4; a laser oscillator 14.
- Claim 6; a cover with an opening (Fig. 1-2).
- Claim 8; the mirror is located below the handle (Fig. 1-2).

Allowable Subject Matter

4. Claims 9 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., permit a reflected image to be observed from a **front** side of the saw) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The Examiner agrees with applicant's remarks that Aziz et al. does not show a mirror permitting a reflected image to be observed from a **front** side of the saw.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Silken, Waite, Hsiung, Levine and Peot et al. are cited to show related device.
